Hazardous Weather

Hazardous Weather

Critical fire weather conditions return once again to the far western Panhandles today.

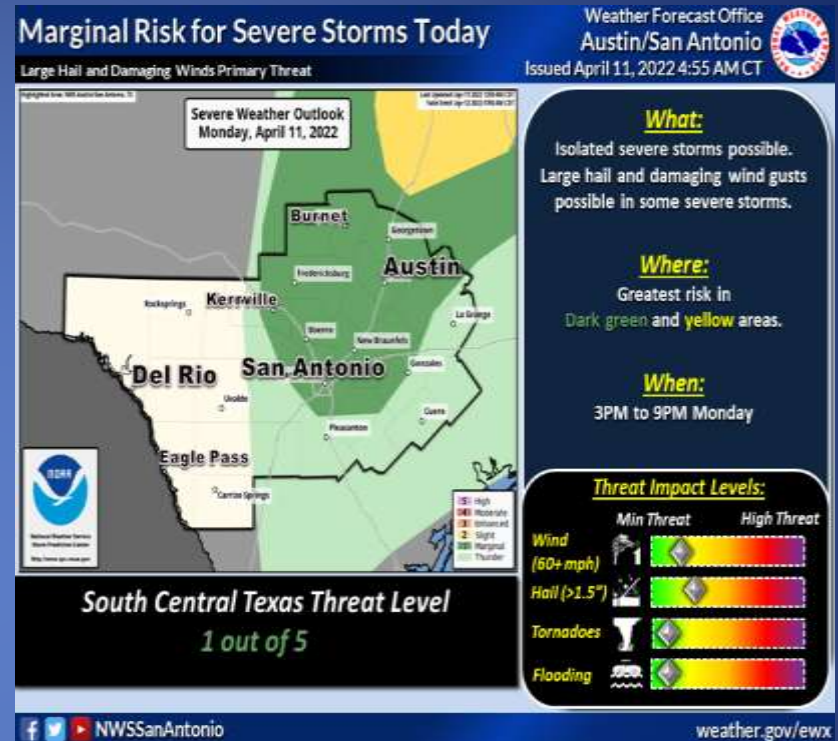

Monday will be partly to mostly cloudy, very breezy and warm with highs in the 80s to lower 90s. There is a low chance of thunderstorms but any storm that does manage to develop will be capable of large hail, damaging winds and a few tornadoes. South winds will prevail between 15 and 25 mph with some gusts to 35 mph. There will be an elevated fire threat west of US-281 this afternoon.

Hazardous Weather

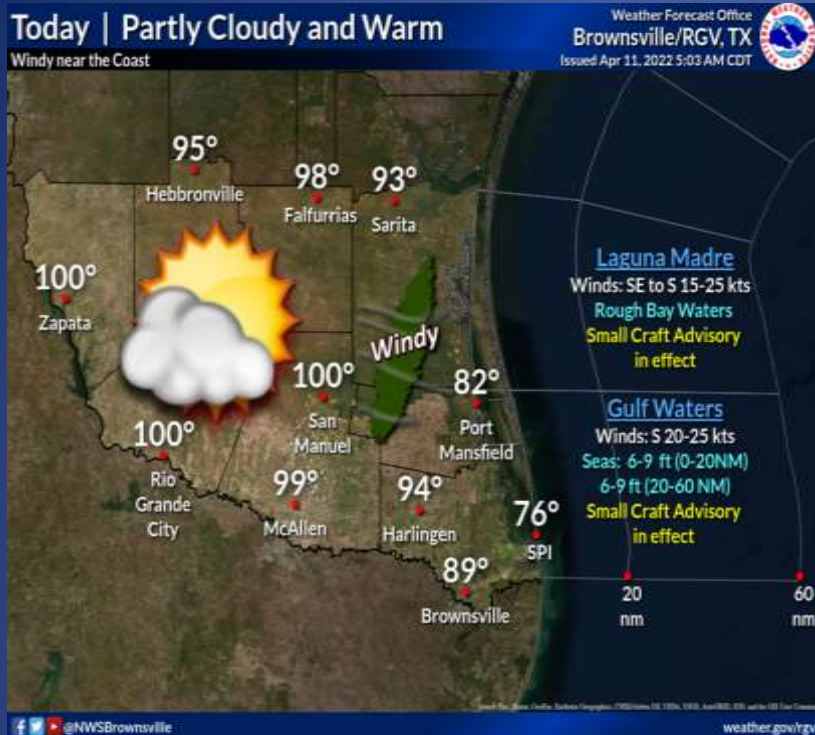

Partly to mostly cloudy this morning becoming sunny west this afternoon with a fire danger. Isolated thunderstorms east of I-35 and north of I-10 this morning, then a slight chance of isolated thunderstorms this afternoon and evening across central areas. Some storms could be strong to severe.

The is a Marginal Risk (1/5) for severe storms this afternoon and evening across the eastern Hill Country and I-35 corridor. The main risks will be large hail and damaging wind gusts should any isolated severe storms develop.

Hazardous Weather

Look for a partly cloudy and warm day across deep South Texas with high temperatures ranging from the 70s at the coast to near the century mark out west. Conditions will be windy near the coast. Refrain from outdoor burning as fire weather conditions remain elevated.

A Red Flag Warning is in effect today for Southeast New Mexico and most of West Texas with critical fire weather conditions expected along with extreme fire danger. Stay aware and be careful, as fires will have the potential to rapidly spread and grow out of control. If you see smoke or a fire, report it immediately!

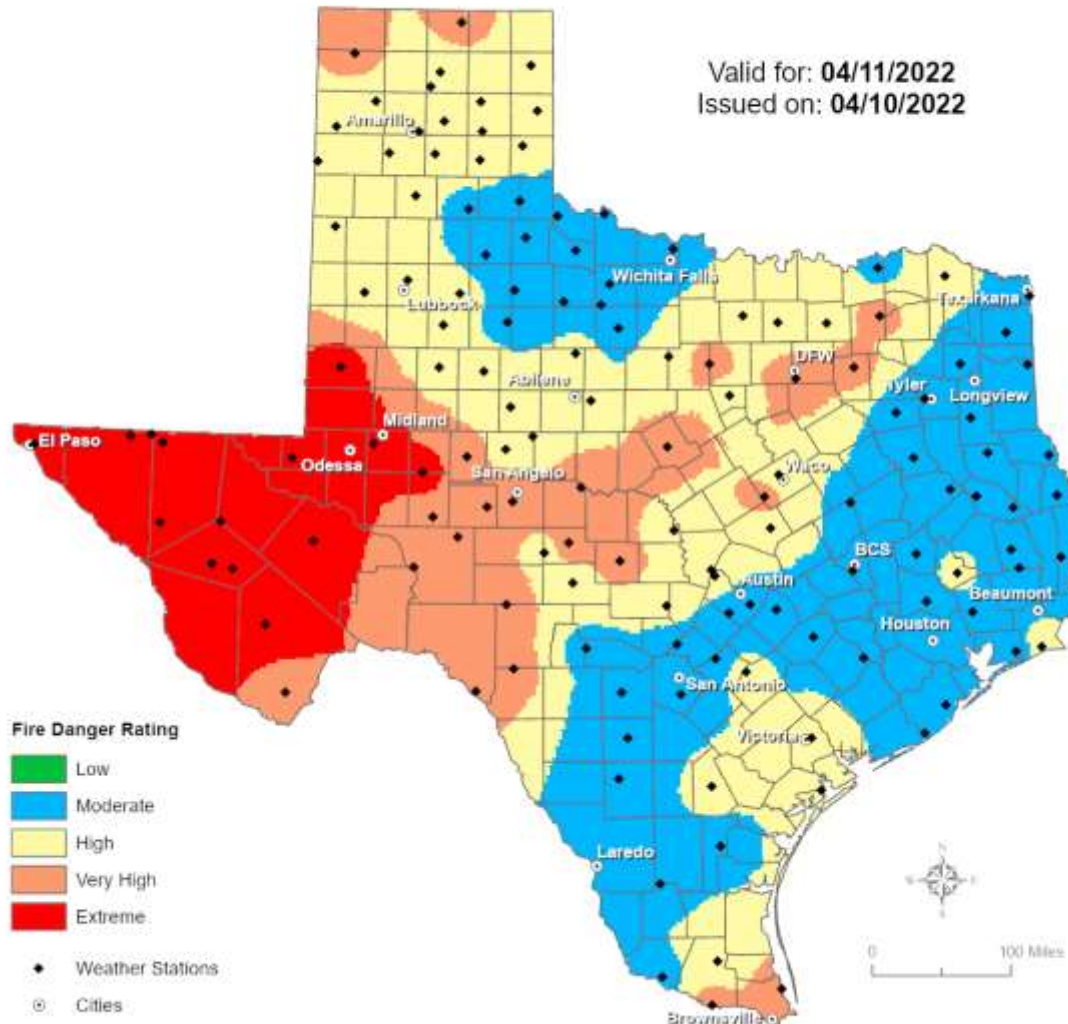

Weather Warnings/Advisories Issued

DATE	WARNING TYPE	LOCATION
